

These flashcards are designed to complement a Mathwarehouse third grade lesson plan. You are welcome to download and copy them, free of charge, to use in your classroom. They are under copyright, however. Please see the terms of use at <http://www.mathwarehouse.com/copyright.php> for details.

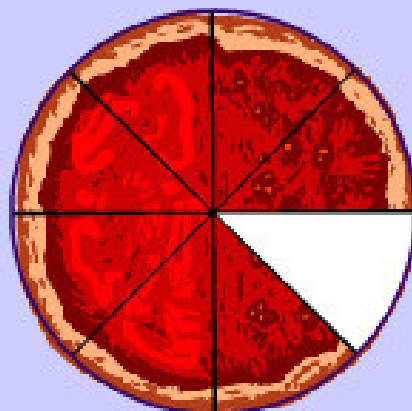

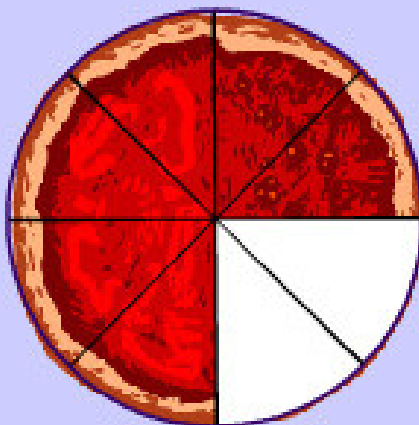

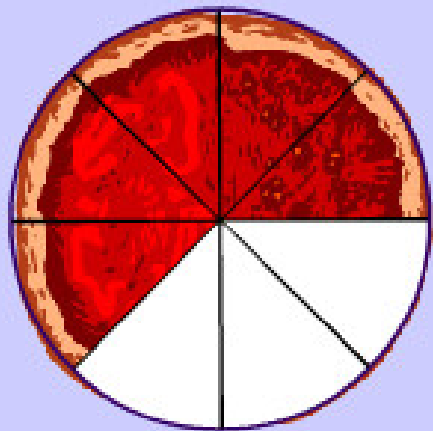

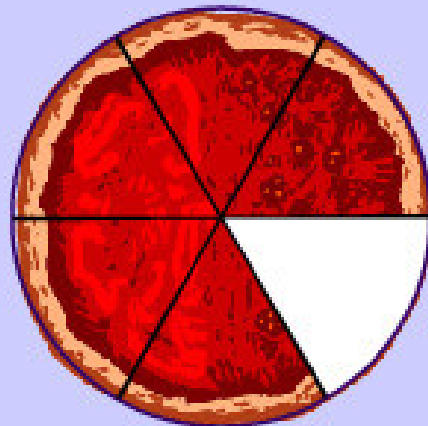

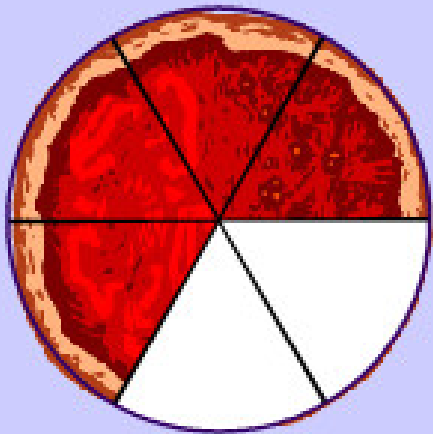

These flashcards are an integral part of the third grade lesson plan 'Fractions and Ordering: Discovering Equivalence'. For this lesson plan, you will need to print and cut out one set of the flashcards for each of your students. If you'd like to reuse them in other classes, I recommend that you laminate each printed sheet before the cards are cut.

At the end of the lesson you can also send the cards home with your students, with instructions for the parent on how to play 'fractions memory', a game which will help students gain automatic recognition of all the fractions he is expected to be familiar with in third grade.
